

STEPS TO ELIMINATING HEPATITIS C

EXPAND TESTING

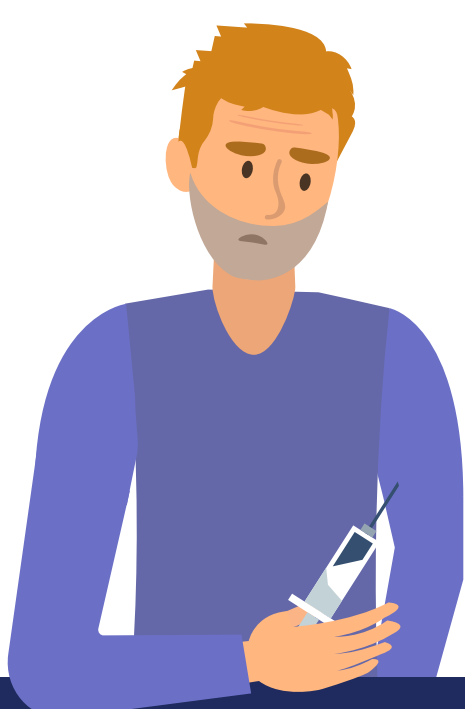

3 OUT OF 4 PEOPLE

with **hepatitis C** don't even know they have it.

To prevent **irreversible harm**, asymptomatic people **NEED TESTING** to know if they are infected.

Testing approaches should be tailored to **HIGH-RISK POPULATIONS:**

Intravenous drug users

Baby boomers

Incarcerated people

EXPANDING TESTING
CAN SLOW THE SPREAD OF HEPATITIS C.
