

# CO-PAY ACCUMULATORS ARE COSTING CANCER PATIENTS

**CO-PAY CARDS** reduce medication costs for cancer patients.

But when health plans use co-pay accumulator programs, **PATIENTS MUST STILL PAY THEIR FULL DEDUCTIBLE** out of pocket.

Faced with unmanageable out-of-pocket expenses, **CANCER PATIENTS MUST CHOOSE** between treatment and other necessities.

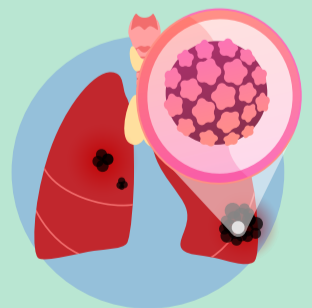

Patients who are **PRICED OUT OF ACCESS** may:

Be unable to access drugs that could improve or save their lives

Experience unchecked symptoms

Risk tumor growth

**Co-pay accumulators** price patients out of cancer care.
