

DON'T LEAVE ATRIAL FIBRILLATION UNADDRESSED

Afib increases risks
for serious health issues.

3-5x

more likely to
have a stroke

5x

more likely
to experience
heart failure

**Patients can learn
their AFib status**
by asking their health
care provider for
screening.

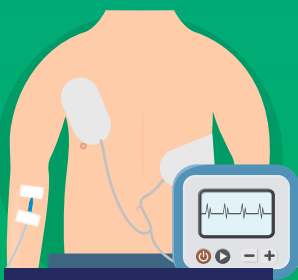

**If AFib is detected, patients and providers
should discuss treatment options.**

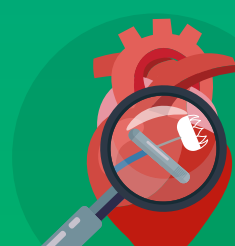

These include:

MEDICATION

PROCEDURES

DEVICES

**AFIB TREATMENT CAN'T BE
ONE SIZE FITS ALL.**

Patients need access to a full range
of treatment options.
