

HEALTH DISPARITIES IN ASTHMA

**MORE THAN 25 MILLION PEOPLE
IN THE UNITED STATES HAVE ASTHMA.**

But health disparities place a heavy burden on certain groups.

Black Americans are **40% MORE LIKELY** to have asthma than white Americans.

American Indian and Alaska Native children are **50% MORE LIKELY** to have asthma.

GREATER AWARENESS & PATIENT-CENTERED POLICIES CAN:

Encourage patients to pursue a diagnosis

Educate patients about their asthma

Ensure patients receive the right treatment

**ALL ASTHMA PATIENTS
DESERVE TIMELY ACCESS
TO THE RIGHT CARE.**
