At community centers and local health clinics, patients can receive:

- **On-site testing**
- **Rapid diagnosis**
- **Immediate treatment**

Point-of-care testing meets patients where they are.

- **Lack of awareness**
- **Hard-to-reach populations**
- **Lengthy wait times for test results**
- **The gap between test results and treatment**

Early detection is critical.

But testing can be difficult due to:

Expanding point-of-care testing breaks down barriers...

And gives more patients the chance to **cure their hepatitis C**.

The road the hepatitis C elimination starts with **accessible testing**.

**EXPANDING Hepatitis C Testing for Patients of Color**

**Patients of color** are disproportionately affected by hepatitis C, and are more likely to suffer chronic infection.

**HEPATITIS C**

**MOBILE HEPATITIS C TESTING**

**EXPANDING Hepatitis C Testing for Patients of Color**

**And gives more patients the chance to cure their hepatitis C.**

**The road the hepatitis C elimination starts with accessible testing.**

**AsPA**
